## **DETAILED ACTION**

### ***Information Disclosure Statement***

The information disclosure statement (IDS) submitted on June 24, 2005 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

### ***Allowable Subject Matter***

Claims 1-28 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claims 1 and 15, prior art fails to teach or reasonably suggest varying the electric field with time such that the electron is incident upon the sensor with an arrival energy that is dependent upon the arrival time of the photon, in addition to the other limitations of the claim.

Claims not specifically addressed would be allowable due to their dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Suyama et al. (US 6,940,589) Suyama discloses an apparatus for measuring an arrival time of a photon. Suyama discloses the apparatus comprising a photocathode that emits an electron when struck by a photon, a sensor that detects the electron emitted by the photocathode, and an electric field that accelerates the electron (col. 4, line 64 - col. 5, line 10).

Bateman et al. (US 6,906,318) discloses in Fig. 5, an ion detector that comprises a photocathode that emits an electron when struck by a photon, a sensor that detects the electron emitted by the photocathode, and an electric field between two microchannel plates. Bateman further discloses in a different embodiment (figs. 11A and 11B), the electric field strength can be varied with time, however fails to expressly correlate the arrival energy of the electron with arrival time of the photon.

#### ***Telephone/Fax Information***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Suez Ellis whose telephone number is (571) 272-2868. The examiner can normally be reached on 8:30am-5pm (Monday-Friday).
